

Our Wondrous World

What you should know already know?

Our world is one of the many planets in space. It is made up of seven continents and many different oceans and seas. On each continent there are many countries across the northern and southern hemispheres. Within these countries there are many different habitats, including many species of animals and plants.

The world consists of different biomes-

Environmental issues

Energy saving, clean living, pollution, global warming, climate change

Vocabulary:

Biome- A large natural environment occupying a major habitat

Climate- The weather conditions in one area in general or over time

Solar system- The collection of eight planets and their moons in orbit round the sun

Hemisphere- A half of the earth, usually as divided into northern and southern halves by the equator

Continent- Any of the world's main continuous expanses of land (Europe, Asia, Africa, North and South America, Australia, Antarctica)

Washed up on an island in the Pacific, Michael struggles to survive on his own. With no food and no water, he curls up to die. When he wakes, there is a plate beside him of fish, of fruit, and a bowl of fresh water. He is not alone...

Michael Morpurgo's classic children's book *Kensuke's Kingdom* is a thrilling adventure story and winner of The Children's Book Award (2000).
